August 14th Member Meeting

On Line Registration Opens July 25th, 2018

Ready to have some equipment fun?

The August 14th, CLA Member Meeting will be held and hosted by Ohio CAT. Our Host's promise some hands on equipment time and tour. This will be an evening meeting. More details will be emailed.

5252 Walcutt Court, Columbus, OH 43228

September 11th Member Meeting

On Line Registration Opens August 20th, 2018

Tour the grounds of the people's house, The Ohio Statehouse. This will be a morning meeting. Information and Registration will be emailed beginning on August 20th.

After the meeting, browse the goodies offered at the Pearl Market on Capital Square.

The Ohio Statehouse
1 Capitol Square
Columbus, Ohio 43215

OHIO STATEHOUSE

A note from our President

We went from a cold, snowy, and rainy spring right into Hot Humid wet Summer weather.

Our June member meeting partnered with OLA, (Ohio Landscape Association), was an awesome meeting thanks to Andrew Muntz's great programming. The morning Chadwick Arboretum walk and diagnostic workshop took us through much of the grounds and rooftop landscapes. Then lunch and member meeting before going on the Grand Tour of the OSU Stadium which included: The Recruit room, The Band room, Athletic Director's mega suit, Press box, and the other suites. Plus the on the field walk through and discussion with groundsman about both the real turf fields as well as the artificial turf fields maintenance. The best and most detailed OSU Stadium tour I've had the privilege to be on to date.

OLA has expressed doing more joint events in the Columbus area. Please let your CLA board members know your thoughts about joint CLA/OLA events.

The 2019 Home and Garden Show floor plans are shaping up with letters of intent now due. There maybe room for one or two more gardens. If interested in participating in the 2019 Home and Garden Show. Now is the time to contact the 2019 Home and Garden Show Chair, Roger Jr. Seely or Board President, Daniel Huggett.

The 2018 Fall Home and Garden Show is in need of four gardens. The 2018 Fall Home and Garden Show will be held at the same time as Oktoberfest on the Fair grounds. The idea is two events for the price of one. The thought is there will be significant crossover traffic. Please contact Roger Jr. Seely or myself, if you maybe interested or for more information.

The 2019 Outdoor Living Tour in August has been Canceled due to lack of CLA member entries for the Outdoor Living Tour. There will be a reassessment doing the Outdoor Living Tour going forward. Please voice your thoughts about the Outdoor Living Tour for 2019. Please contact Molly John or myself with your thoughts for this event.

The next CLA Member Meeting is August 14th with registration beginning at 5:00pm and the activities starting 5:30 pm. Look for more details on this meeting as we go forward.

Looking forward to seeing everyone at the August CLA member meeting at 5:00pm

Have a Great Summer.

Daniel Hugget, CLA Board President

June Member Meeting

The June 12th CLA meeting began with mingling and meeting members of the Ohio Landscape Association, before separating into groups for a tour of Chadwick Arboretum led by Pamela Bennett, Dr. Steven Still, Wendy Bowman and the Student Employees of Chadwick. New plant species and recently noticed diseases were observed and discussed during the nearly two hour tour of the 60 acres of Chadwick.

A short CLA member meeting was held during lunch outside Kottman Hall overlooking the Chadwick gardens in front of Howlett Hall.

After Lunch the group walked across campus for a private tour of the iconic Shoe. The seemingly endless rain even held off until the end of the tour. It was a Great Day to tour, learn and collaborate.

Thank you to Ohio Landscape Association for Joining with CLA and Assisting in organizing this Event. Mary Maloney - Director Chadwick Arboretum, Wendy Bowman – Horticulturalist, Student Employees, Pamela Bennett, Dr. Steven Still, Andrew Muntz, Sandy Munley – OLA, Rick Doll –OLA

Welcome to Buckeye Resources Inc.

Buckeye Resources, Inc. specializes in mulch, soils, and plant material to the Horticultural Industry. Our company has been in business for over 25 years and has an outstanding relationship with our customers as well as our vendors.

How may we be of service? Please [E-Mail Us](#) call us at 1-937-462-8346.

2019 Home and Garden Show

The Home and Garden show committee will be collaborating with the Greater Columbus Arts Council for the 2019 Dispatch Home and Garden show. The theme has not available at this time. This collaboration will strengthen and bring attention to the artistic concepts of Landscape Design.

Serious changes to the Ohio Expo Center are nearly complete. The addition of more seating and walls will change the floor plan, but not the anticipation of spring that occurs each February.

Stepping into the Classroom

Joe Boff is leaving his position as CLA member and Board Trustee to become the Landscape Design and Management Instructor at the Eastland Career Center. Joe will also be leaving Wolf Creek Company. He will now be an Honorary Member, so we hope to see him at some of the meetings.

We wish him well.

ONLA Announces New Format for Midwest Green Industry Experience

Posted by: Alana Settle ONLA

Ohio Nursery and Landscape Association announces that it is transitioning to a new format for its annual conference, *Midwest Green Industry Experience*. ONLA will host the 2018–2019 MGIX Series, a collection of three professional networking programs that prioritize education, business development, collaboration, and relationship building.

While ONLA enjoyed a successful regional tradeshow, MGIX and previously known as CENTS, for many years, the association is confident that this new model will better serve its membership with more personalized programming spread throughout the year and offered in different locations across the state.

The first event in the series, the *MGIX Member Summit*, takes place on December 12 and 13, 2018 in Columbus, Ohio at Hilton Easton. This premier, two-day conference provides a solutions-based learning experience for business owners and professionals in the landscape and nursery segments and facilitates collaboration amongst attendees and sponsors. Highlights include a keynote presentation by Terri McEnaney, President of Bailey Nurseries, and ONLA's annual awards celebration.

In March 2019, ONLA will host *MGIX Training Days: Gear Up for Spring* on March 5, 2019 in Dayton, Ohio and March 7, 2019 in Cleveland, Ohio. These one-day programs will feature education sessions, workshops, business development, and networking opportunities for landscapers, growers, and retail garden centers.

The Search for CLA Board Members

Are you looking for a unique leadership opportunity? Have you been yearning to put your talents in the Green and Landscape Industry, people skills, organization, member recruitment, or policy advocacy in the service of a great cause? Well, look no further!

CLA and Board is searching for nominees to fill the position of Trustee to replace the departing Joe Boff through 2019 when his term expires. The CLA Board has in the past consisted of nine members. We are now down to six.

Any active, paid Columbus Landscape Association Member can become a Board Member—Trustee. Having a full board would lesson individual board responsibilities and increase the membership participation and improve the Green Industry. Board Meetings are the First Tuesday of each month at the Ohio Turf Foundation.

If possible it would also be helpful if an individual could become a board members and also handle the Facebook, Twitter and Snapchat feeds for the CLA activities and keep the tech world informed of what the CLA is doing.

If you are interested or would like to nominate any active member please contact:

*Daniel Huggett 740-983-8873 colturf@columbus-turf.com or
Fred Blyth 614-873-3600 fblyth@columbus.rr.com.*

Scholarship- Donations down because the Scholarship Donation was not included on the online payment form.
Working to correct

Home & Garden Show- Ellen Winners People's Choice – Cedarbrook Gardens

Library Choice Awards 1st Seely's, 2nd Cedarbrook, and 3rd Wood Landscape

Membership: Andrew: Next Member Meeting Date: Tuesday June 12th, 2018 Location: OSU- Chadwick Arboretum
Time: TBA all-day. More Details in coming emails and website

Program- Andrew: Andrew is working to confirm Dates, times, sponsors for 2018. Will be on Website, Newsletter and sent to members thru email.

Unfinished Business:

New Business:

- Thank you to Hidden Creek Landscape for Sponsorship and Refreshments.
- Thank you to Jim Scott and Landscape Students of the Knox County Career Center for Hosting the Member Meeting. Students introduced themselves and spoke about future plans after graduation,
- The board-appointed subcommittee (Andrew, Fred, Molly) met before today's meeting to review and approve the 2018 Home and Garden Show budget. - Motion by Jason to ratify the subcommittee vote. Second by Dick, motion passed.
- Election of Board Member- Secure a good and willing candidate. Then conduct election.
- Outdoor Living and Landscape Tour Sponsorship – Forms. (Forms Available)
 - Send copy of Sponsor Form to members via email
 - General Sponsorship forms will be emailed to members
- Member Directory – March / April By-Laws included and updated.
- NewScape Newsletter- Will be available the month before the next member meeting
- Home and Garden Show wrap up meeting, Tuesday, March 27 2018-3pm. Oakland Nursery
- Outdoor Living and Landscape Tour Intent to Participate meeting will be forthcoming. Details emailed.
- Intent to participate in the Home and Garden Show April Meeting, Tuesday, April 24, 2018 – 3pm Oakland Nursery – if interested Contact Roger Seely Jr. with questions.

Scheduling of Next Meeting: Next Member Meeting Date: Tuesday June 12th, 2018 Location: OSU- Chadwick Arboretum- More Details in coming emails and website -this will be a day meeting.

Sponsor: Available for next member meeting

Adjourn: 10:30 Moved by Ellen, 2nd by Andrew motion passed. Students conducted program tours and answered questions.

CLA Member Directory 2018 was mailed to active members this spring.

Staying aware: UV rays affecting your crews?

Beth Hyatt | June 5, 2018 as published online by

Dehydration and illnesses or injuries caused by sun exposure are nothing new to the **green industry**, but there are many preventative tips you can share with your crews to keep them safe.

Recently, experts on hydration and skin care conducted a webinar to discuss some of the most effective methods that can be used when working outside to prevent **skin cancer**, dehydration and more.

Ultraviolet awareness and skin cancer

Ultraviolet (UV) rays come in three forms: UVA, UVB, and UVC.

UVA rays account for 95 percent of the UV radiation that reaches Earth's surface. These rays are able to penetrate the skin more deeply than UVB, which causes wrinkling and premature aging.

UVB rays are the main cause of sunburn and skin reddening, and these play a key part in skin cancer development. UVC rays are blocked by the ozone layer, however, they are created artificially during industrial processes, like welding.

“Most of ultraviolet radiation is in the wavelength of UVA,” said Armand Coppotelli, skin health expert and business development and training manager for Deb USA. “UVA is just short of visible light, however, it is the longest of the wavelengths of ultraviolet radiation. The telltale marks of UVA radiation are really aged skin, premature aging, and leathery skin. It's also a source of skin cancer.”

As a landscaper, there's no way to avoid working in the harsh sun, and realistically speaking, there's no way to avoid getting burned a little during the workday. The main objective is to avoid sun exposure so severe that it leads to skin cancer.

Coppotelli says that on average, about 8,500 people in the United States get skin cancer every day, one in every three cancers diagnosed is a skin cancer and 3 million people are annually treated for skin cancer.

Melanoma accounts for almost 10,000 deaths a year, according to Coppotelli, because it is a serious, metastatic cancer. Around 90 percent of non-melanoma skin cancers are associated with exposure to UV rays from the sun.

Coppotelli notes that the most common factors that cause skin cancer are exposure to UVA, UVB and UVC rays and carcinogenic materials. Research shows that those who work outdoors naturally have a higher average risk of developing skin cancer, and this risk climbs even higher for landscapers and construction workers.

Coppotelli noted the following facts about UV rays:

- Excessive exposure can be carcinogenic to humans
- These rays cannot be seen or felt
- They are not related to temperature
- They can pass through loosely woven material
- They can pass through clouds
- They can bounce off reflective surfaces, such as metal, concrete, snow, and water
- UVA rays can pass through glass

UV index

A good way a measuring UV exposure is by using what is called the UV index, which was adopted by the World Health Organization. This index, Coppotelli says, tells you on a daily basis what the UV levels are and when sun protection methods are required.

For those working outdoors, the index recommends seeking sun protection as soon as the index reaches three, even when the

sun isn't shining. To view the index for today, click [here](#).

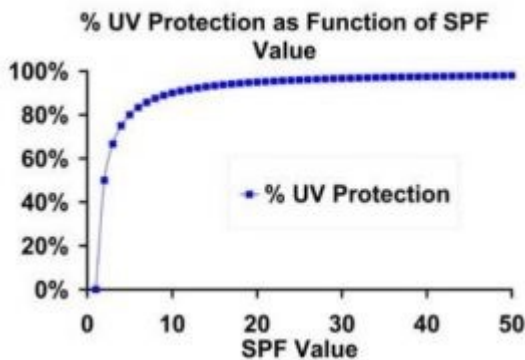

Coppotelli recommends sticking to the idea of APC when dealing with sun exposure: **A**void UV exposure, **P**rotect the skin and **C**heck for early signs of skin cancer. He also suggests following the five S's:

- Slip on sun protection clothing
- Slop on minimum SPF 30 sunscreen
- Slap on a hat and neck protection
- Slide on some sunglasses
- Shade from the sun when possible

Sunscreen

When deciding which sunscreen is right for your crew, Coppotelli recommends going straight for the professional grade sunscreen products with a few key features.

The sunscreen should be a broad-spectrum SPF 30 type that can withstand UVA, UBA, and UVC rays, and it should also be able to absorb quickly and not affect a crew member's ability to operate equipment.

The sunscreen should also be able to withstand heavy perspiration or immersion in water, and it must be reapplied every 80 minutes at minimum.

Coppotelli advises against the use of spray-on sunscreens, no sunscreens that come as a powder or towelette, brands with Retinyl Palmitate (Vitamin A) and nothing with an SPF higher than 50. Coppotelli remarks that a sunscreen with an SPF of 15 will block 94 percent of UVB rays, and SPF of 30 will block 97 percent of UVB rays and an SPF of 45 will block 98 percent of UVB rays.
